## NWSA Seeking Industry Participation in Foreman Job Task Analysis Online Survey

Dear Colleague,

The National Wireless Safety Alliance (NWSA) **needs your help!** Please see the survey request below and provide your valuable input or forward this request to anyone else within your organization that can help by providing their insight.

As you know, it is NWSA's mission is to provide thorough, independent assessments of knowledge and skills and provide verifiable worker certification to enhance safety, reduce workplace risk, improve quality, encourage, and recognize the skilled professionals who work on towers and other non-standards structures.

You may also be aware that NWSA currently has two programs for [Telecommunications Tower Technician certifications](#) which some employers indicate are either preferred or required in their job postings. As a continuation of its mission, NWSA is now in the process of developing an Antenna and Line Specialty and a Foreman Certification.

As part of the development process, NWSA is conducting a Job Task Analysis (JTA) and asking foremen for input to ensure the new NWSA Certified Foreman Examination accurately reflects today's work environment, regulations, and technology. This new certification for the Telecommunications Industry will define a set of criteria to verify that candidates have achieved a measured level of knowledge which industry subject matter experts consider important for a certified individual to possess.

Your opinions and your participation as an industry representative in the JTA process, are vital to this effort. Please take a little time (approximately 30 minutes) to complete the following survey and let us know what is important to you to ensure that your job sites are run as safely and efficiently as possible. I would ask that you complete the survey ***no later than June 25, 2018*** by clicking on the following link:

[NWSA Foreman Job Task Analysis Survey](#)

Thank you in advance for your participation in this important study. Again, we value your opinion and look forward to your participation with NWSA.

If you would like more information on NWSA and its programs, click on this link: [NWSA](#).

Sincerely,

Duane MacEntee  
Executive Director  
National Wireless Safety Alliance

###

*About National Wireless Safety Alliance*

*NWSA, headquartered in Fairfax, VA, is a national non-profit assessment and certification organization established to provide thorough, independent assessments of knowledge and skills and verifiable worker certification in order to enhance safety, reduce workplace risk, improve quality, encourage training, and recognize the skilled professionals who work on towers and other non-standard communication structures.*
