National Wireless Safety Alliance to Host Webinar on Prepping for the NWSA Exam

(Salt Lake City, UT) – The National Wireless Safety Alliance (NWSA) will host a webinar on Wednesday, June 17, from 12:00 to 1:00 p.m. ET focused on Prepping for the NWSA Exam.

This session is designed for individuals interested in pursuing NWSA certification, including first-time candidates, recertifying technicians, and those seeking a clearer understanding of the certification process. The webinar will provide practical guidance on how to effectively use the NWSA Candidate Handbook as a preparation resource.

The webinar will cover the following topics:

- How to navigate and use the NWSA Candidate Handbook
- How NWSA exams are developed and maintained
- Common misconceptions about exam preparation
- Practical tips for preparing effectively and confidently

NWSA presented this information earlier this year at the NATE UNITE Conference in Las Vegas.

“We are excited to share this information more widely for the benefit of individuals interested in pursuing NWSA certification,” stated Jan Hice-Smith, Customer Care, Outreach, and Marketing Coordinator. “This webinar gives candidates a clearer understanding of the tools and resources available to help them prepare.”

“We recognize that customers and candidates have asked for more information on how best to

prepare for the exam,” said Jaclyn Mangum, Associate Director of Program Management. “Our goal is to help candidates understand how to leverage the reference materials NWSA provides while maintaining alignment with our accreditation requirements.”

Webinar details and registration information will be posted on the NWSA homepage at <https://www.nws-a.org> and communicated directly to customers. For questions, please contact customerservice@nws-a.org.

NWSA certification embodies and exemplifies our core values of Safety, Quality, and Proficiency. For more information about NWSA certification programs and digital credentialing, please visit <https://www.nws-a.org>.
